LL0410AA is linear low density polyethylene copolymer containing butene-1(C4) as co monomer with based on INEOS's gas phase technology. It is suitable for blending with conventional LDPE.

**Features:** films made from pure LL0410AA have the following advantages over LDPE: better sealing, lower seal shrinkage, greater drawdown ability and higher stiffness & toughness. This grade has food contact approval.

**Processing Method:** extrusion (blown film)

**Application:** green house film, silage film, hand bags and general-purpose film applications.
