

SV0157-W2901 is one of the styrenic ter polymers (ABS) compound grades with improved toughness versus HIPS grades. **Features:** **SV0157-W2901** exhibits low shrinkage and good dimensional stability. **SV0157-W2901** has high melt strengths which widely used for the production of extruded sheet and some of considerable size and thickness shaped with white color. **Processing Method:** extrusion **Application:** include panels for large appliances and thermoformed items such as hot tubs, recreational vehicle parts and refrigerator liner with white color.

Note: Drying prior to processing is recommended in a desiccant de humidifying hopper dryer. An inlet air dew point of 20°F (-29°C) or below is recommended to achieve a moisture content 0.1%. Typical drying conditions are 2 hours at 180°-190°F (82° - 88°C). Drying for 4 hours at 160° - 170°F (71°-77°C) is also adequate.
