

**Description:**

"DAPC-HP550P" is a high melt flow polypropylene homopolymer for the production of BCF, CF and fine denier staple fibers at medium to high spinning speeds.

"DAPC-HP550P" is suitable for nonwoven fabrics for diapers, medical-sanitary applications and wipes. Another typical application is high tenacity continuous filament for straps backpacks, sport bags, bulk bags and safety belts. Continuous filament with medium tenacity is used for upholstery and sportswear. "DAPC-HP550P" is also suited for the production of bulked continuous filament for carpets.

**Processing Method:**

Fiber Extrusion (BCF, CF, Staple)

Injection molding

**Features:**

High melt flow

Good processability

Homopolymer

**Typical Applications:**

Wipes and tissues

Straps for backpacks, sport bags, bulk bags and for safety belts

Upholstery and sportswear

Bulk continuous filament for carpets

Nonwoven staple fiber

Injection molded article, housewares, etc.
