

Specifications

| | |
|--------------------------|---------------------------------------|
| HS Code | 715335 |
| Chemical Formula | $-(CH_2CH(OH))_n-$ |
| Appearance | White to off - white powder |
| Solubility | Soluble in water |
| Viscosity | Relatively high in aqueous solution |
| Degree Of Polymerization | Around 2400 |
| Hydrolysis Degree | About 88 mol% |
| Melting Point | Around 230 - 240 °C |
| Density | Approx. 1.27 - 1.31 g/cm ³ |
| Film Forming Property | Good, forms strong and flexible films |
| Adhesion | Good adhesion to many substrates |

As an accredited Polyvinyl Alcohol 2488 (PVA 2488) factory, we enforce strict quality protocols—every batch undergoes rigorous testing to ensure consistent efficacy and safety standards.
